

# Instructional Designers in an AI Enterprise

How to bring your skills into the emerging  
blended work of people and algorithms

Ted Smith, PhD

CEO

“

# The Hype

”

By 2020, customers will manage 85% of their relationships with an enterprise without interacting with a human”

– Gartner

One of the most significant shifts in the transformation of healthcare is the shift from manual to automated patient engagement.”

– Frost & Sullivan Global Research

- “We have some catching up to do in the area of machine learning and artificial intelligence.” ~**Klaus Froehlich**
- “Artificial Intelligence, deep learning, machine learning—whatever you’re doing if you don’t understand it—learn it. Because otherwise you’re going to be a dinosaur within 3 years.” ~**Mark Cuban**
- “Just as electricity transformed almost everything 100 years ago, today I actually have a hard time thinking of an industry that I don’t think AI (Artificial Intelligence) will transform in the next several years.” ~**Andrew Ng**
- “Artificial Intelligence will be rampant in the digital supply chain” ~**Dave Waters**
- The field of Artificial Intelligence is set to conquer most of the human disciplines; from art and literature to commerce and sociology; from computational biology and decision analysis to games and puzzles.” ~**Anand Krish**
- “Machine intelligence is the last invention that humanity will ever need to make.” ~**Nick Bostrom**

# Poll Question

In what time horizon will AI/Machine Learning become a common consideration of decision making about how a job function should be performed?

- A) Never
- B) 5 Years from now
- C) 10 Years from now
- D) 20 Years from now
- E) >20 Years from now

# Historical Importance of Instructional Design and Delivery

- The most important investment made to create a ready workforce in time of great change
- The best way to ensure alignment of human performance and organizational goals
- A gap-closing capability used to create business-capable resources from incomplete new talent
- Others?

# Megatrends in Talent

- Outsourcing

Total Form 1099-MISC and W-2 Returns by Year, Indexed to 1989

## What's Being Outsourced Today

Information Technology	55%
Administration	47%
Distribution and Logistics	22%
Finance	20%
Human Resources	19%
Manufacturing	18%
Contact Centers/Call Centers	15%
Sales/Marketing	13%
Real Estate/Facilities Management	11%
Transportation	9%

- Automation

- Management, Business, and Financial
- Computer, Engineering, and Science
- Education, Legal, Community Service, Arts, and Media
- Healthcare Practitioners and Technical
- Service
- Sales and Related
- Office and Administrative Support
- Farming, Fishing, and Forestry
- Construction and Extraction
- Installation, Maintenance, and Repair
- Production
- Transportation and Material Moving

## Americans view certain professions as being at greater risk of automation than others

*% of U.S. adults who say it is \_\_\_ likely that the following jobs will be replaced by robots or computers in their lifetimes*

- Automation

Note: Data for "own job or profession" is based on those who are currently employed. Respondents who did not give an answer are not shown.

Source: Survey conducted May 1-15, 2017.

"Automation in Everyday Life"

# Poll Question

When you think about the kinds of training programs organizations use today, how many of the job functions associated with that training are likely to either be replaced by automation or significantly augmented by automation?

- A) No more than we have seen automated to date
- B) <20% more of future job functions will be significantly impacted
- C) <50% more of future job functions will be significantly impacted
- D) >50% more of future job functions will be significantly impacted

## AI's effect on the workforce

How do you expect AI will affect the workforce in the next five years?

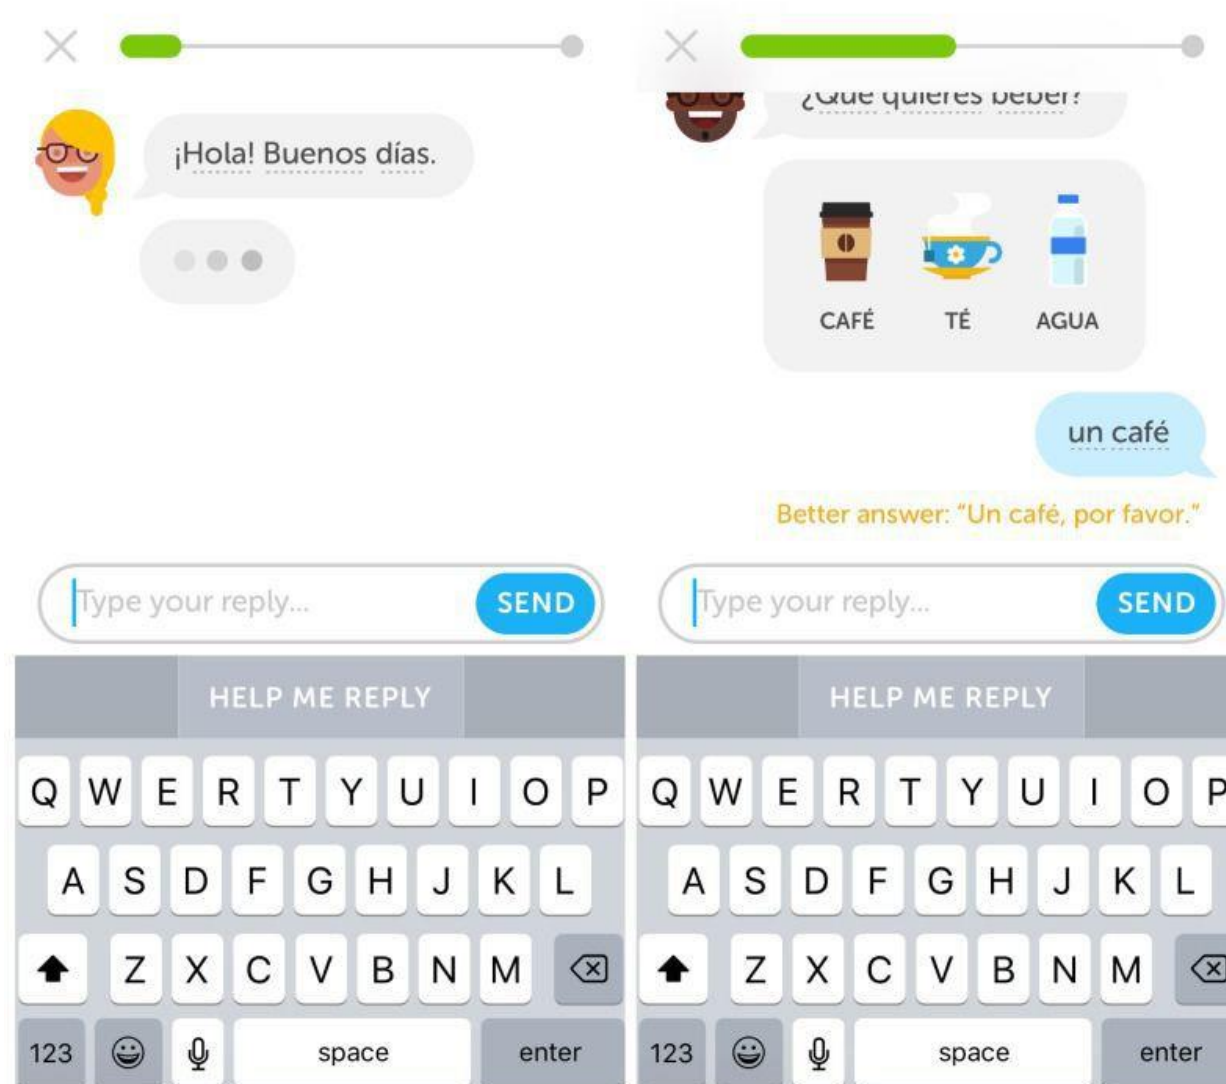

Percentage of respondents who somewhat or strongly agree with each statement

<https://jobmarketmonitor.com/2017/09/07/the-future-of-work-artificial-intelligence-ai-wont-replace-most-jobs-but-people-using-it-are-starting-to-replace-people-who-dont/>

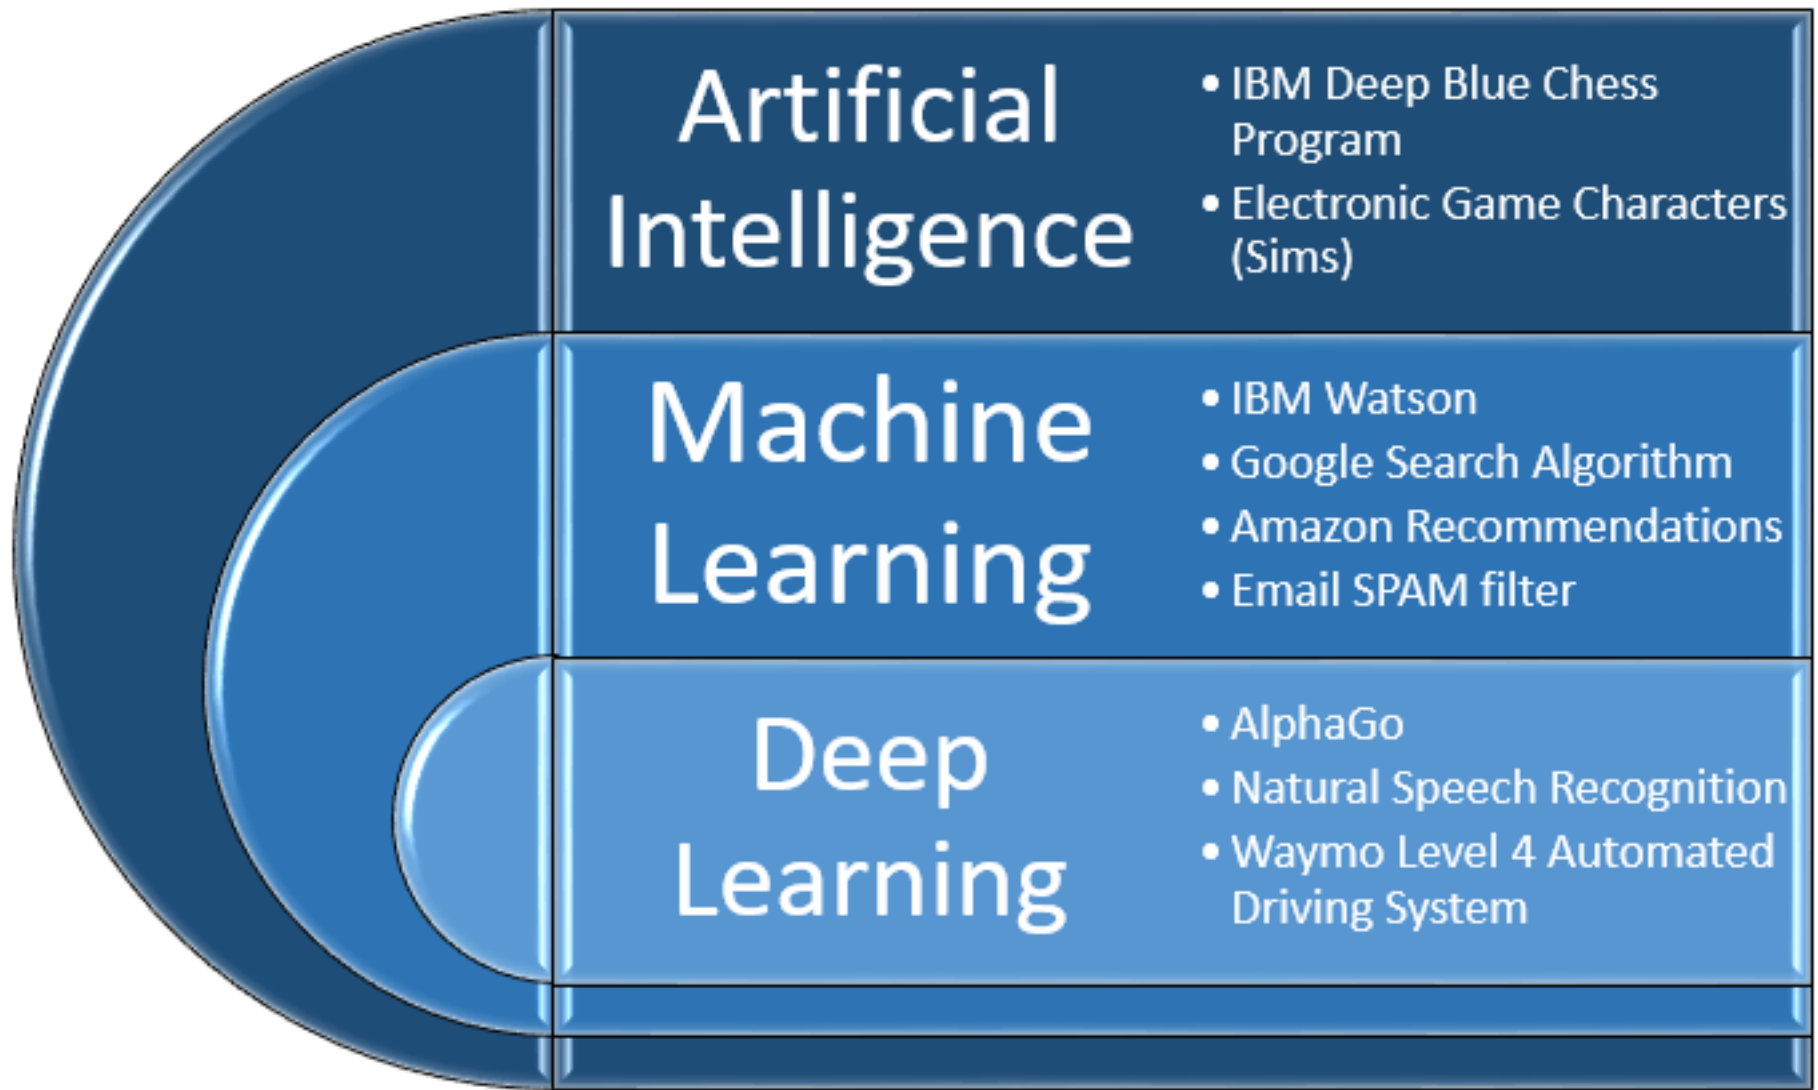

# The Third Wave of Talent Development

- Cognitive substitution and social emulation

A machine that can learn how to interact with humans and other machines and make decisions based on unique circumstances at high levels of performance and negligible incremental cost

# Cognitive Computing

# Decisions About Talent in the Future

- Can I buy the skills I need or do I need to build them? (who makes this decision?)
- Is there new technological capability that can change the kinds of products and services my organization delivers (who makes this decision?)
- Can this activity be performed by a “agent” that I train to do this work? (who makes this decision?)

# Poll Question

Where do you think we are on the AI/ML hype cycle as it related to instructional design and delivery business?

- A) Peak
- B) Trough
- C) Slope
- D) Plateau

# Where are we on the Hype Cycle?

<https://webcourseworks.com/2018-elearning-predictions-updated-hype-curve/>

# Opportunities for the ID&D Professional Today?

- The top of the hype cycle means the category will consolidate to a few, high value, working solutions in the near future
- Nearly every enterprise considering AI is doing it without thinking all the way through roles and capabilities in the organization
- Now is the best time for “hand raisers” or individuals willing to suggest they can help sort it out

# Two Things for Monday Morning

- Get to know a data scientist
- Experiment with an AI-based learning system (Babylon Health, DuoLingo, etc...)
- Build your own “pitch” for the benefits of expertise in designing, developing and evaluating achieved performance solutions regardless of whether it is human, tech or human+tech

# Thank You!
