

THE 3 L&D QUESTIONS EVERY COMPANY MUST ANSWER

October 2018

Eric Duffy | VP Product Strategy

 @dufstar

 @degreed

GOAL

Transform the way you
think about and approach
L&D

The 3 Questions

1. What skills should I learn?
2. How do I learn them?
3. Why should I learn them?

BOLD **ASSERTION**

Answer these 3 questions,
and L&D will become the
most valuable function in
your organization

WHY NOW?

Here, have some
pennies...

1 BILLION PENNIES

Exponentials are
not intuitive

WE LIVE IN AN EXPONENTIAL WORLD

Accelerating Growth in Technology

(condensed)

WE LIVE IN AN EXPONENTIAL WORLD

Which means:

1. Rapid change is our new normal
2. The rate of change is accelerating

THE TAKE- AWAY

Accelerating change is here to stay.

Embrace the uncertainty.

**CEOS
ALREADY
ARE**

90%

Global Executives

agree that their organizations will be
disrupted to a great or moderate extent

**CEOS
ALREADY
ARE**

11%
CEOs

believe their current talent
pool has the right set of skills

That's the good news...

THE CHALLENGE TO OVERCOME

8%
CEOs

see business impact of learning &
development

HOW DID WE GET HERE?

- Learning technology was created to store, deliver and track content.
- And it works!
- ...In a world where the future is relatively static and predictable

THE

**TAKE-
AWAY**

The traditional mode of L&D will not serve us moving forward.

A new approach and mindset is necessary.

**WHAT SKILLS SHOULD
I LEARN?**

By way of analogy...

**By way of
analogy...**

Understanding both supply and demand

Supply

- Who has what skills?
- At what level?
- How are they changing?

Demand

- What skills do we need?
- At what level?
- How are they changing?

THE TAKE- AWAY

You can't manage
what you can't
measure.

Leverage big data to
continually measure
supply and demand of
skills.

**HOW DO I LEARN
THEM?**

Three key challenges

1. The content you need lives everywhere
2. The right content is continually changing
3. Timely delivery is more important than ever

THE

**TAKE-
AWAY**

You must be willing to give up control.

Your crucial role is to enable and empower your workforce to develop itself.

**WHY SHOULD I
LEARN THEM?**

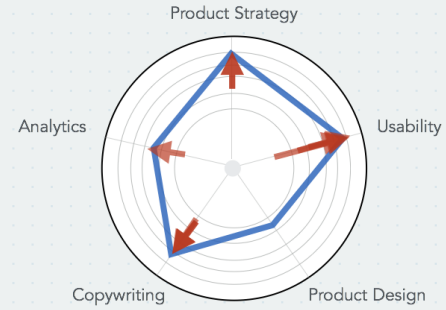

“Employees spend 1%
of their time on
learning...”

People want to
progress; to advance
their careers

Employees want to progress

Internal Candidate 1

Internal Candidate 2

Internal Candidate 3

Internal Candidate 4

Organizations want to retain their competitive edge

Measuring learning activity no longer enough. Instead, focus on:

- Skill gaps
- Internal mobility
- Correlations to key business metrics

THE TAKE- AWAY

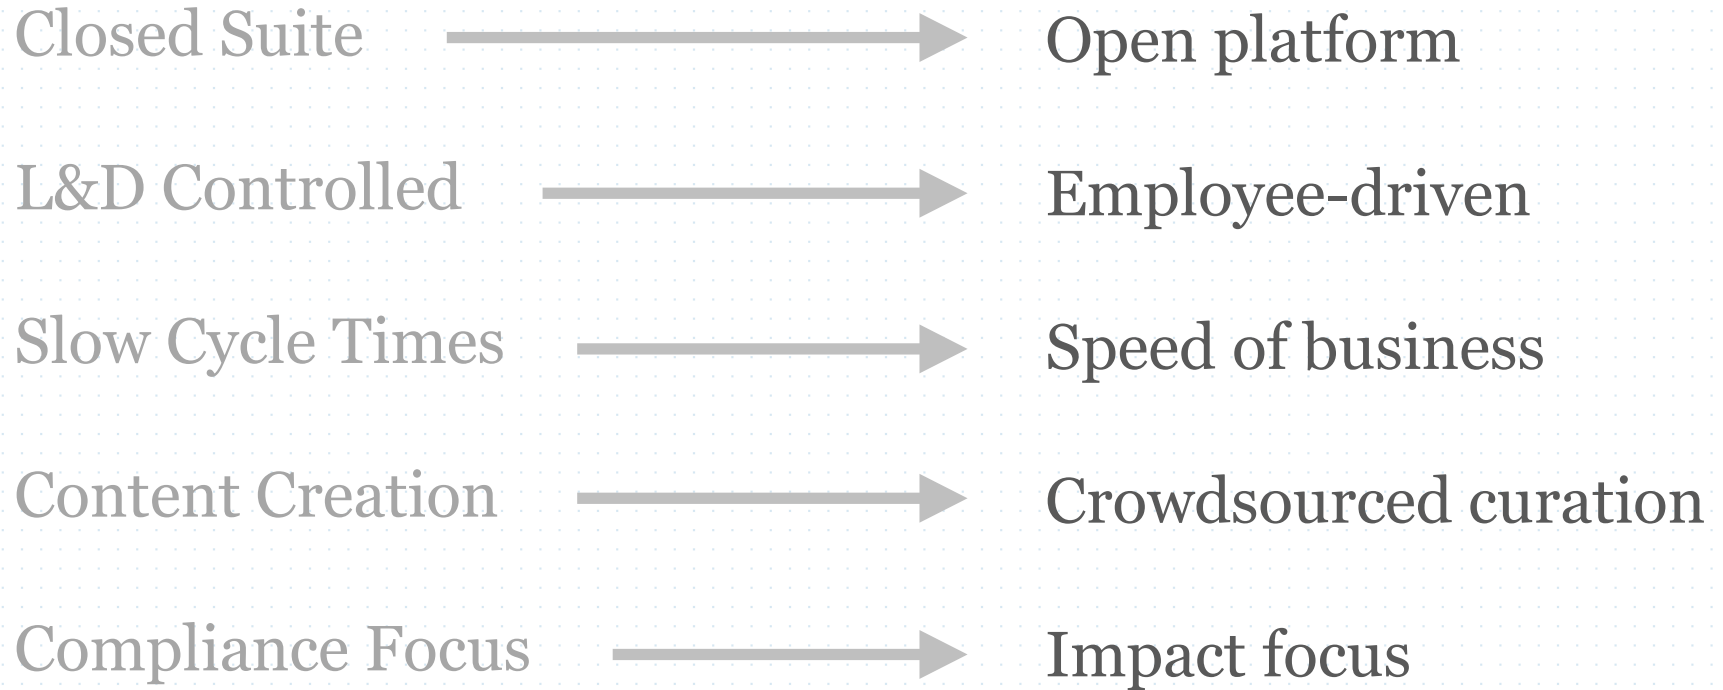

Show employees how learning will advance their careers.

Replace learning metrics with talent metrics.

**L&D HAS
NEVER BEEN
MORE
IMPORTANT**

Be the heroes we need
