

See AI-Powered Adaptive Training & Learning at Work

September 27, 2021

About Us

Our mission is to transform workforce training and learning through personalization to drive performance.

Adaptivity powered by AI is the game-changing technology required to improve performance through personalized learning.

More and more large-scale organizations are turning to Realizeit when they realize that their conventional learning technologies (i.e., LMS, LCMS and LXP) fall short of their aspirations for transformation.

Recognized as an Industry Innovator

Transforming how organizations drive performance through adaptive training and learning

“

*The attractiveness of the platform is its digital mobile experience, but the value is in its ‘**adaptivity**’. To know what workers already know and map against what they need to know, then delivering the missing pieces eliminates so much wasted redundancy in our legacy, one-size-fits-all training.*

Head of Training Innovation & Operations
Fortune 50 Public Company
(130,000+ Employees Worldwide)

”

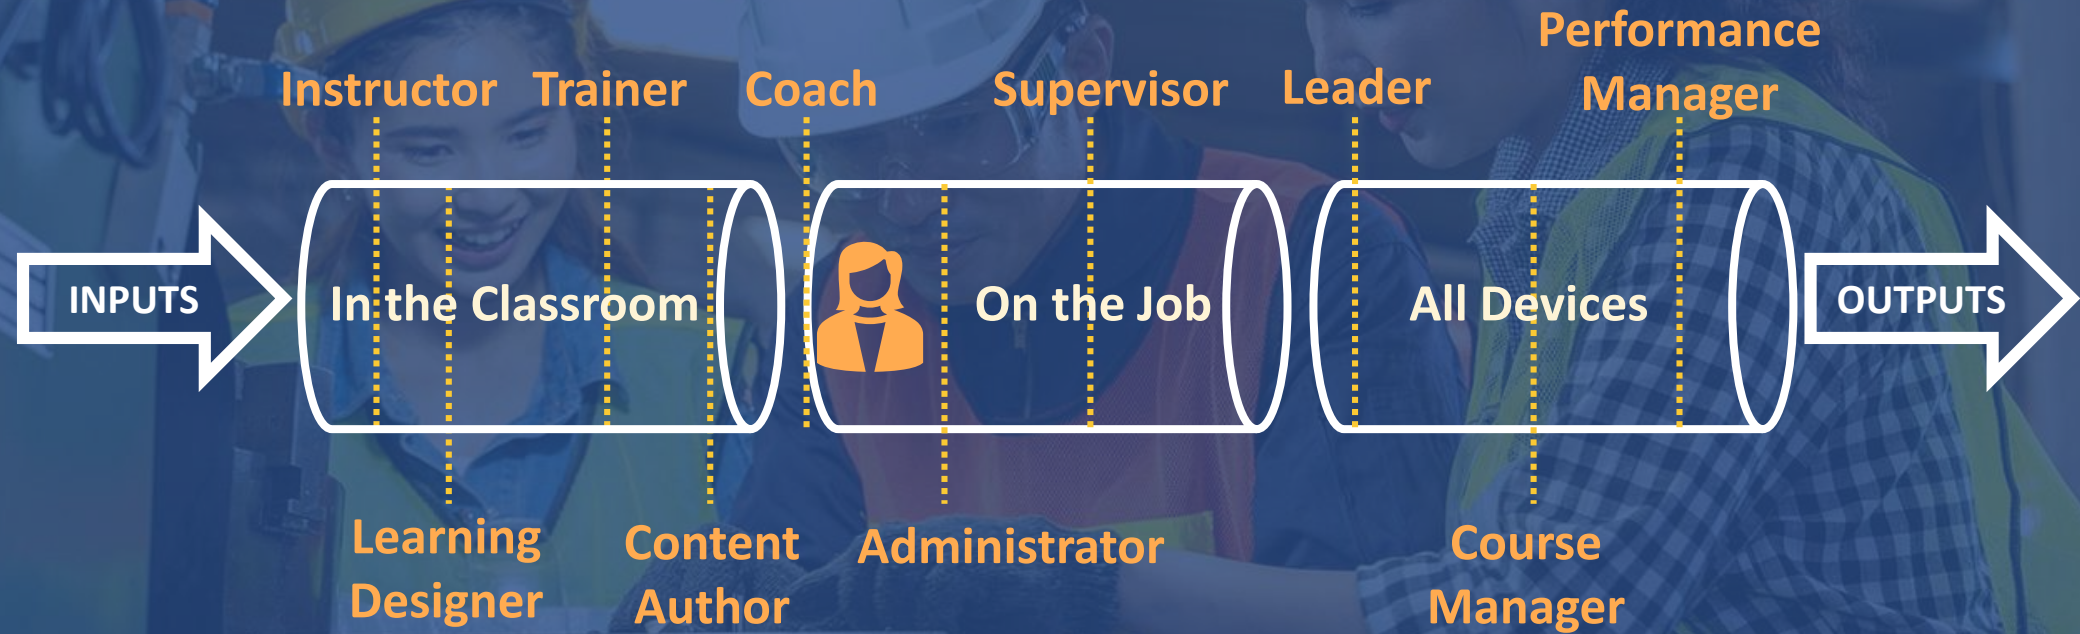

“

Our vision was to build a training tool that a trainer wouldn't dream of training without. We've accomplished that with Realizeit.

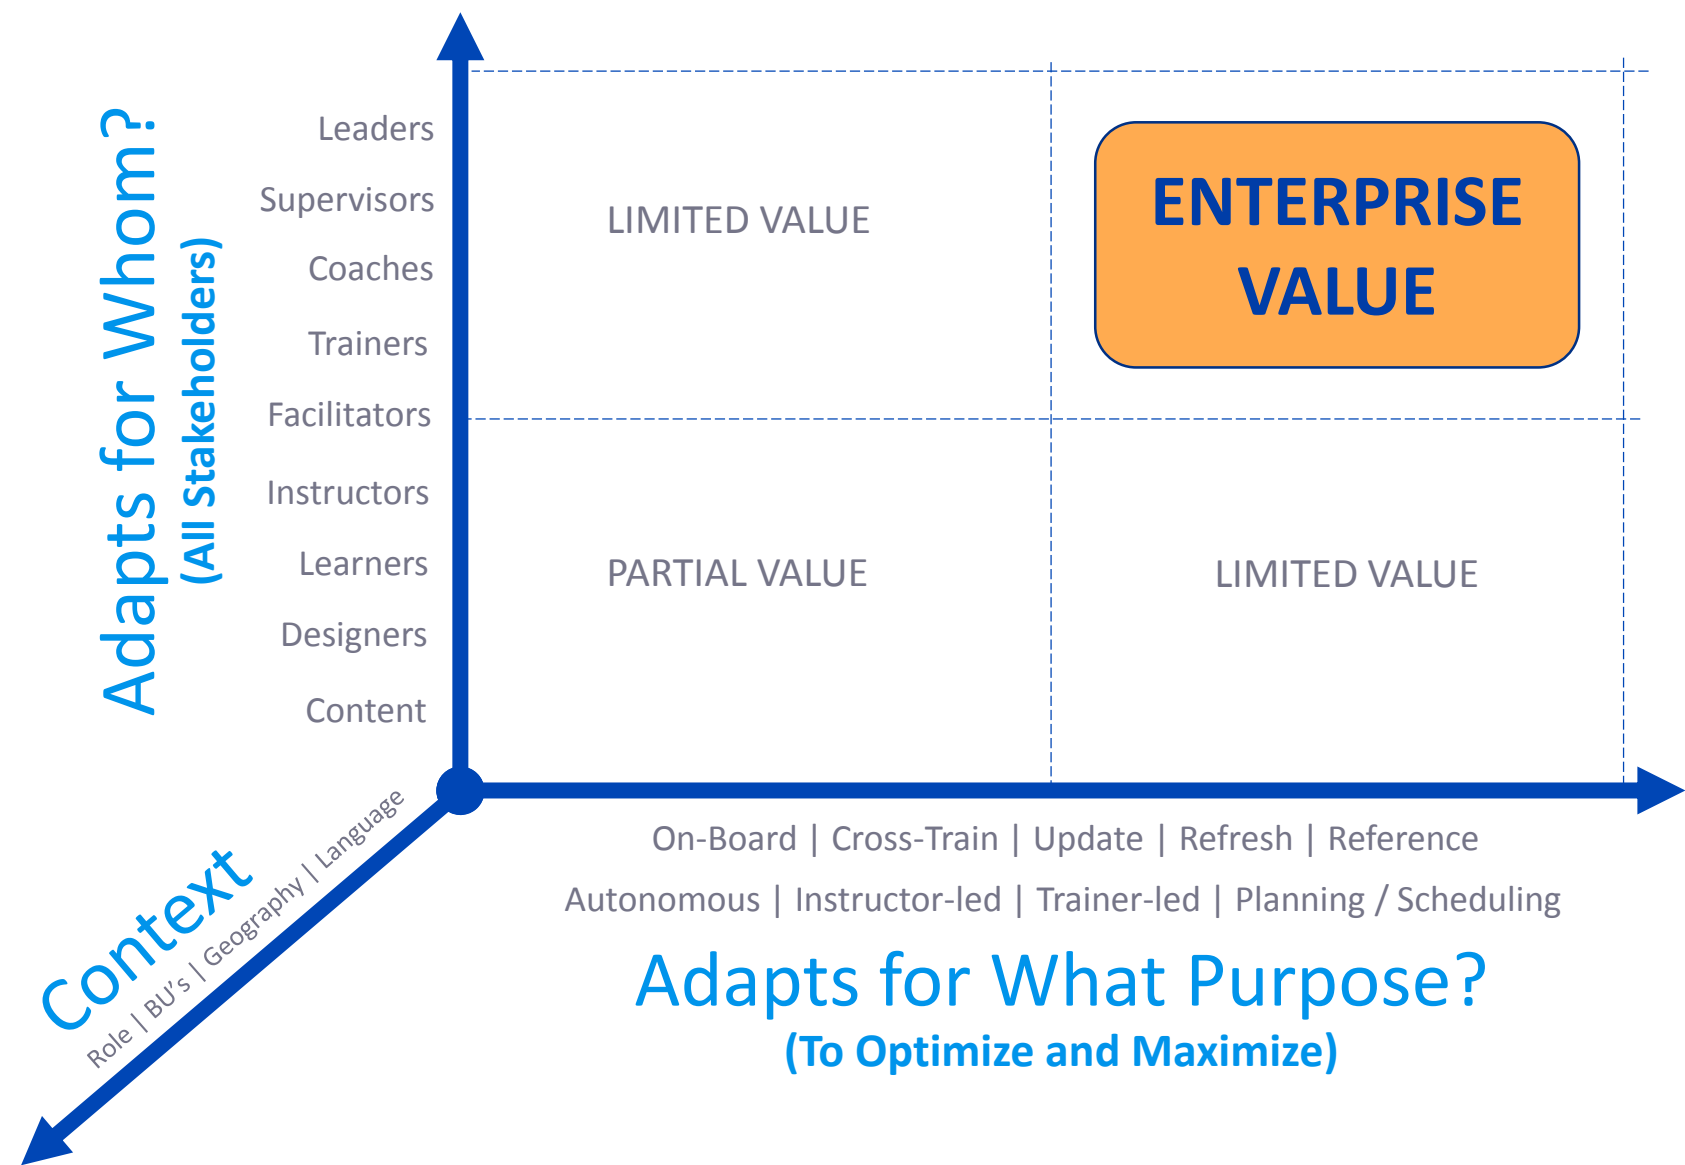

Head of Training Strategy & Planning
Fortune 50 Public Company
(130,000+ Employees Worldwide)

”

We approach Training & Learning like a “business process” with inputs, outputs and stakeholders

Enterprise Adaptivity Value Model

Today's Demo: 3 Stakeholder Roles

Learners

- Individualized experiences supporting all stages of learning
- Increased engagement through personalization
- Rapid speed to competence for onboarding and cross training
- Reduced time to upskill and reskill

Performance Managers

- Adapt to the needs of the individual, the group, and environment in real time
- Efficiency by involving managers at the right time
- Improved effectiveness of training through insights and analytics

Leaders

- Full workforce visibility for domain of responsibility
- Manage gaps and risks related to workplace knowledge
- Assurance of knowledge across the enterprise

Other Typical Stakeholder Roles
