

Modern and engaging microlearning for the hybrid workforce

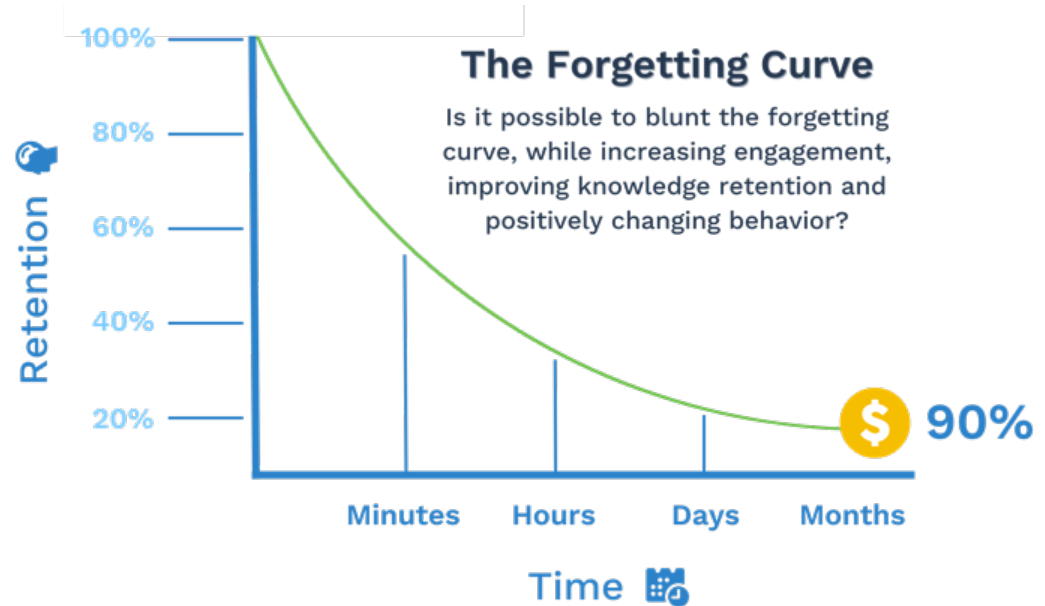

Leigh Harrison
Product Manager

Jenna Berris
Product Marketing Manager

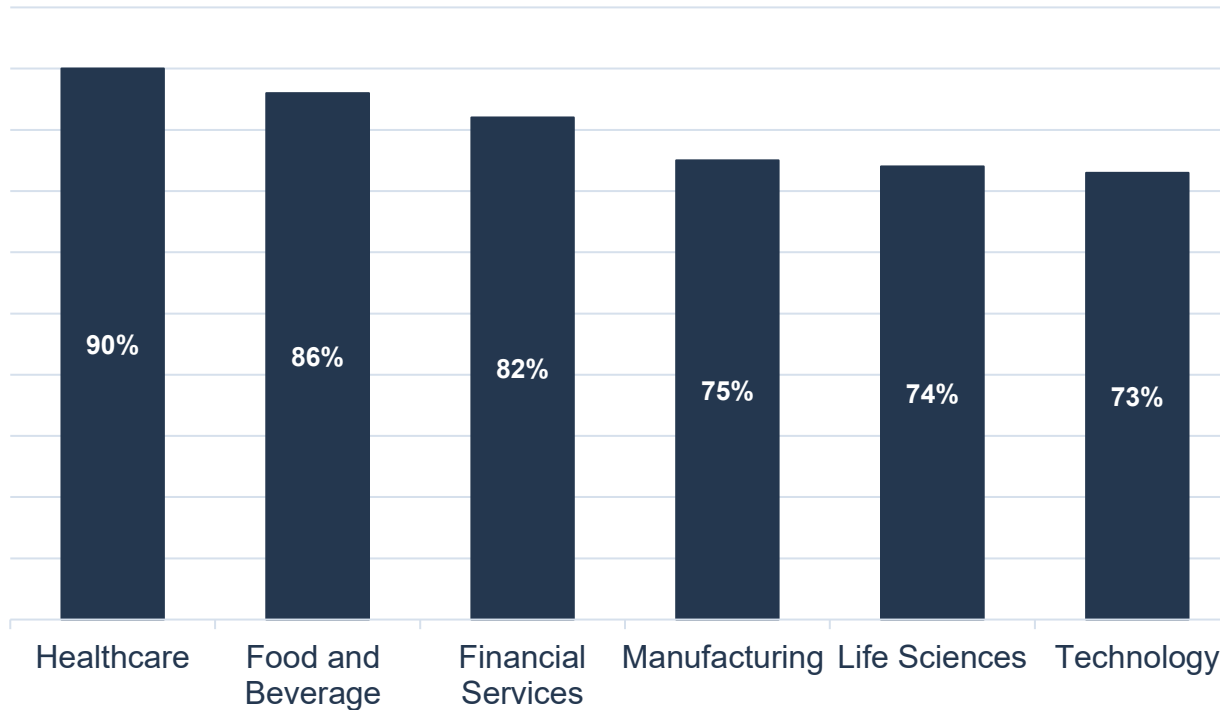

Traditional learning methods and systems are not optimized for today's hybrid workforce

- Low training engagement and completion rates
- No correlation to performance
- Poor knowledge retention – 75%+ forgotten after 30 days
- Learning that is not aligned with business goals
- Talent shortage and need to upskill current workforce
- Shorter attention spans and burnout

The workplace is at a turning point

Burnout by industry

73%

of respondents say it's difficult for employees to find the time to take training courses in the flow of their workday

81%

of respondents believe their organization needs to update its approach to workplace learning

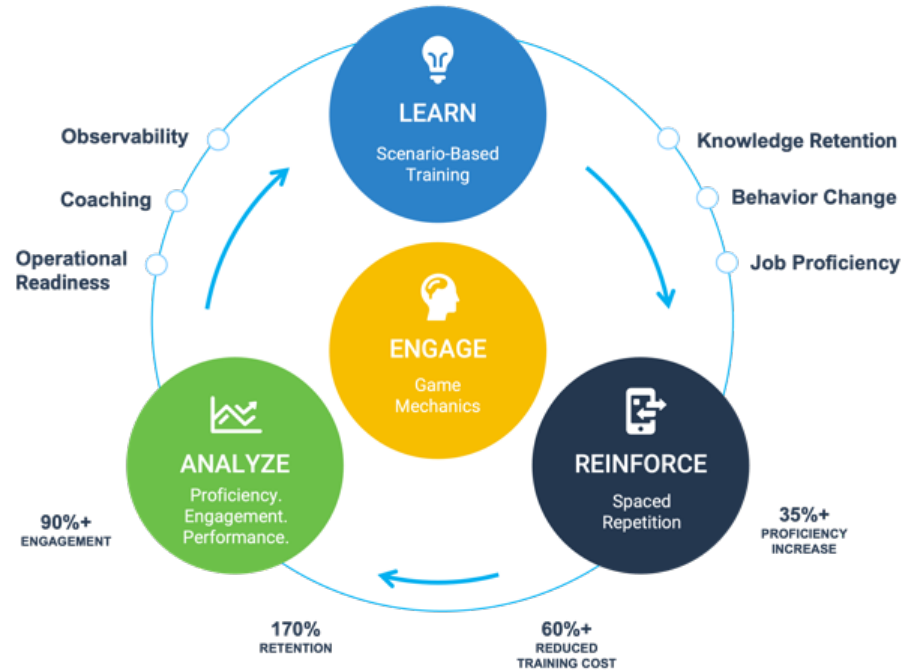

How can you get more from your learning tech?

Qstream delivers the highest level of retention, engagement and efficiency

Microlearning that delivers knowledge reinforcement through scenario-based testing and spaced repetition
