

A portfolio you can count on
in any economic climate.

An investment in customer satisfaction

Today's high performance hearing devices demand more from their battery. *Much more.*

This is the reason audiologists in the know recommend premium quality power one batteries. With high and stable voltage, power one batteries deliver top performance in power hungry digital hearing devices. With a stable, more predictable discharge curve, power one makes managing battery use far easier. With dependable energy extending to the very end of battery life, there's no more guesswork about when to change the battery.

Why offer power one to your patients?

power one has the most comprehensive family of premium hearing aid batteries and accessories. This means you can recommend power one brand for virtually any device. power one delivers the long lasting energy required for the latest, and most sophisticated device technologies. The idea is simple: Better performing hearing devices result in more satisfied customers.

■ Mercury free batteries provide power, performance & dependability. Great for the patient and a better solution for the environment.

■ Mercury free IMPLANT plus batteries from power one are the top choice for cochlear implant recipients.

■ One ACCU rechargeable battery can replace nearly sixty conventional hearing device batteries.

More products, more solutions.

Join the mercury free generation.

Next generation, mercury free cells from power one deliver longer-lasting, high and stable voltage with less impact on the environment. Perfect for today's power hungry digital devices, they are available for virtually every type of hearing instrument.

- Unique sealing technology ensures reliability
- Longer tabs for easier handling
- Convenient packaging
- High energy density

■ Stainless steel case and unique, three-fold sealing provide improved corrosion resistance and far better protection from leakage.
